Mark Scheme (Results)
November 2020

Pearson Edexcel International GCSE In Biology (4BI1) Paper 1BR

## Edexcel and BTEC Qualifications

Edexcel and BTEC qualifications are awarded by Pearson, the UK's largest awarding body. We provide a wide range of qualifications including academic, vocational, occupational and specific programmes for employers. For further information visit our qualifications websites at www.edexcel.com or www.btec.co.uk. Alternatively, you can get in touch with us using the details on our contact us page at www.edexcel.com/contactus.

## Pearson: helping people progress, everywhere

Pearson aspires to be the world's leading learning company. Our aim is to help everyone progress in their lives through education. We believe in every kind of learning, for all kinds of people, wherever they are in the world. We've been involved in education for over 150 years, and by working across 70 countries, in 100 languages, we have built an international reputation for our commitment to high standards and raising achievement through innovation in education. Find out more about how we can help you and your students at: www.pearson.com/uk

## General Marking Guidance

- All candidates must receive the same treatment. Examiners must mark the first candidate in exactly the same way as they mark the last.
- Mark schemes should be applied positively. Candidates must be rewarded for what they have shown they can do rather than penalised for omissions.
- Examiners should mark according to the mark scheme not according to their perception of where the grade boundaries may lie.
- There is no ceiling on achievement. All marks on the mark scheme should be used appropriately.
- All the marks on the mark scheme are designed to be awarded. Examiners should always award full marks if deserved, i.e. if the answer matches the mark scheme. Examiners should also be prepared to award zero marks if the candidate's response is not worthy of credit according to the mark scheme.
- Where some judgement is required, mark schemes will provide the principles by which marks will be awarded and exemplification may be limited.
- When examiners are in doubt regarding the application of the mark scheme to a candidate's response, the team leader must be consulted.
- Crossed out work should be marked UNLESS the candidate has replaced it with an alternative response.

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{1 ( a ) ( i )}$ | B cell wall | $\mathbf{1}$ <br> comp |
|  | A is incorrect because it is not the cell membrane <br> C is incorrect because it is not mitochondria <br> D is incorrect because it is not the nucleus |  |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{1 ( a ) ( i i ) ~}$ | D starch | $\mathbf{1}$ |
|  | A is incorrect because it is not chlorophyll <br> B is incorrect because it is not glucose <br> C is incorrect because it is not glycogen |  |

| Question Number | Answer | Additional guidance | Mark |
| :---: | :---: | :---: | :---: |
| 1 (b) (i) | An answer that makes reference to the following points: <br> - A: (chloroplasts absorb light) for photosynthesis / absorb light energy to make carbohydrate / eq (1) <br> - B: (nucleus) controls protein synthesis / contains DNA / contains genes / controls cell / eq (1) <br> - C: (vacuole) contains cell sap eq (1) <br> - D: (cytoplasm) were chemical reactions occur (1) | Allow starch / glucose /sugar <br> Allow maintains turgor / stores water / salts / pigments / toxins <br> Allow where protein synthesis occurs / respiration occurs / medium for reactions | $\begin{aligned} & \hline \mathbf{4} \\ & \text { grad } \end{aligned}$ |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{1 ( b ) \text { (ii) }}$ | An answer that makes reference to the following <br> points: <br> - contains chloroplasts to absorb light / for <br> photosynthesis eq (1) | $\mathbf{2}$ <br> grad |
| - long / arranged in a vertical plane / large <br> surface area / rectangular shape, to absorb <br> most light / eq (1) |  |  |
| • large vacuole to store water (1) |  |  |

Total 8 marks

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| 2(a) | C plasmid | $\mathbf{1}$ <br> comp |
|  | A is incorrect because it is not the cell wall <br> $B$ is incorrect because it is not the nucleoid <br> $D$ is incorrect because it is not RNA |  |

| Question Number | Answer | Additional guidance | Mark |
| :---: | :---: | :---: | :---: |
| 2(b) | An answer that makes reference to three of the following points: <br> - insulin / glucagon (1) <br> - steam / hot water (1) <br> - competition / contamination / eq (1) <br> - mix / stir / agitate / distribute / eq (1) <br> - oxygen / $\mathrm{O}_{2}$ (1) <br> - temperature (1) | Allow disinfectant / bleach / sterilising fluid / alcohol / ethanol <br> Allow infection | $\begin{array}{\|l\|} \hline 6 \\ \text { grad } \end{array}$ |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{3 ( a ) ( i )}$ | D trachea | $\mathbf{1}$ |
|  | A is incorrect because it is not the bronchiole <br> $B$ is incorrect because it is not the bronchus <br> Cis incorrect because it is not the oesophagus |  |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| 3(a)(ii) | B pulmonary artery | $\mathbf{1}$ |
|  | A is incorrect because it is not the aorta <br> C is incorrect because it is not the pulmonary vein <br> D is incorrect because it is not the vena cava |  |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| 3(a)(iii) | A contract contract | 1 |
|  | B is incorrect because the external intercostals do <br> not relax <br> C is incorrect because the diaphragm does not <br> relax <br> D is incorrect because the diaphragm and the <br> intercostals do not relax |  |

| Question Number | Answer |  | Mark |
| :---: | :---: | :---: | :---: |
| 3(b) | An answer that makes reference to four of the following points: <br> - more blood to muscles / less blood to intestine (during exercise) / eq (1) <br> - supply oxygen / oxygenated blood / glucose (1) <br> - respiration (1) <br> - energy / ATP (1) <br> - muscle contraction (1) <br> - less absorption of food / eq, in intestine when running / (1) | Allow converse for at rest Allow blood is diverted to the muscles from the intestine <br> Allow prevent anaerobic respiration / enable aerobic respiration for two marks <br> Allow high blood flow at rest to intestine to absorb food / maintain concentration gradient | $\begin{aligned} & 4 \\ & \text { exp } \end{aligned}$ |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| 3(c) | An explanation that makes reference to two of the <br> following points: <br> • (supply (more)) oxygen / there was a <br> shortage of oxygen (1) | $\mathbf{2}$ <br> exp |
|  | • breakdown / remove lactic acid (1) <br> - repay oxygen debt (1) <br> • anaerobic respiration had occurred (1) |  |
|  |  |  |

Total 9 mark

| Question Number | Answer | Additional guidance | Mark |
| :---: | :---: | :---: | :---: |
| 4(a) | An answer that makes reference to the following points: <br> - arrows in correct direction (1) <br> - food web includes four organisms (in correct places) (1) | Allow MP1 if only one food chain <br> plants <br> $\rightarrow$ caterpillars <br> $\rightarrow$ mice $\rightarrow$ owls <br> = one mark <br> No marks if more than one web drawn and one is incorrect | $\begin{aligned} & 2 \\ & \text { grad } \end{aligned}$ |

| Question <br> Number | Answer | Mark |
| :--- | :---: | :--- |
| 4(b) | • primary consumer $/ 1^{\circ}$ consumer | $\mathbf{1}$ |

| Question <br> Number | Answer | Additional guidance | Mark |
| :--- | :---: | :--- | :--- |
| 4(c)(i) | $3 \times 10^{3}=3000$ per <br> $\mathrm{km}^{2}(1)$ | Allow $\times 5$ for one <br> mark | $\mathbf{2}$ <br> grad |
|  | $\bullet \times 5=15000(1)$ | Allow 3000 for one <br> mark <br> Allow $1.5 \times 10^{4} / 15$ <br> $\times 10^{3}$ <br> Award full marks for <br> correct numerical <br> answer without <br> working |  |

| Question <br> Number | Answer | Additional <br> guidance | Mark |
| :--- | :--- | :--- | :--- |
| 4(c)(ii) | An answer that makes reference <br> to three of the following points: <br> -more food / plants / <br> caterpillars / other sources <br> of food available (1) <br> - warmer weather (1) | $\mathbf{3}$ <br> exp |  |
|  | - fewer other predators / <br> owls ate other species (1) | Ignore fewer <br> owls |  |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| 4(c)(iii) | An answer that makes reference to two of the <br> following points: <br> - feed on other prey (1) <br> - insufficient food / energy to maintain more <br> owls (1) | $\mathbf{2}$ <br> exp |
| - have no predators (1) | birth rate = death rate / birth rate and death <br> rate are similar (1) | owls produce few offspring (so population will <br> not rapidly increase) (1) |

| Question Number | Answer | Mark |
| :---: | :---: | :---: |
| 4(c)(iv) | An answer that makes reference to three of the following points: <br> - use a trap / use filming / use a sample area / use a quadrat (1) <br> - random sampling (1) <br> - repeat (1) <br> - count number of mice / faeces (in quadrat) (1) <br> - calculate average (1) <br> - multiply up to total area (1) | $\begin{aligned} & \hline 3 \\ & \text { exp } \end{aligned}$ |

Total 12 marks

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| 5(a)(i) | An explanation that makes reference to three of the <br> following points: | $\mathbf{3}$ <br> exp |
|  | • $\quad$ oxygen (1) |  |
|  | • respiration (1) |  |
| • energy / ATP (1) |  |  |

| Question <br> Number | Answer | Additional <br> guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{5 ( a ) ( i i )}$ | An explanation that makes <br> reference to two of the following <br> points: | 2 <br> grad |  |
|  | • antibodies (from mother) (1) | to kill bacteria / pathogen / to) antigens (1) <br> virus eq (1) | Allow destroy / <br> bind to <br> pathogens / <br> clump <br> pathogens <br> /mark / label <br> pathogen |

| Question Number | Answer | Additional guidance | Mark |
| :---: | :---: | :---: | :---: |
| 5(b) | An answer that makes reference to two of the following points: <br> - fetus is female / a girl (1) <br> - cells contain 46 chromosomes / 23 pairs / has a diploid number / has two sets of chromosomes / normal number of chromosomes / eq (1) <br> - chromosomes have different lengths / sizes / shapes (1) | Allow does not have Down's syndrome / | $\begin{aligned} & \mathbf{2} \\ & \text { exp } \end{aligned}$ |

| Question Number | Answer | Mark |
| :---: | :---: | :---: |
| 5(c)(i) | An answer that makes reference to four of the following points: <br> - calcium for bone / teeth growth / bone / teeth development / prevent rickets (1) <br> - protein to grow / for enzymes / antibodies / eq (1) <br> - iron for haemoglobin / red blood cells / prevent anaemia (1) <br> - vitamin D for bone growth / bone development / calcium absorption / strong bones (1) <br> - more energy as baby is heavy / mother becomes heavy / more energy for fetal development / to carry baby / eq (1) | $\begin{aligned} & 4 \\ & \text { exp } \end{aligned}$ |

| Question <br> Number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 5(c)(ii) | $\bullet 9=50 \%$ more (1) | Allow one mark for <br> $0.5 / 50 \% / 1 / 2 /$ times <br> 2 | $\mathbf{e x p}$ <br> • $100 \%=9 \times 2=18(1)$ <br> Allow 18 for two <br> marks <br> Award full marks for <br> correct numerical <br> answer without <br> working |

| Question <br> Number | Answer | Additional <br> guidance | Mark |
| :--- | :--- | :--- | :--- |
| $\mathbf{6 ( a )}$ | An explanation that makes <br> reference to two of the following <br> points: | 2 <br> • as distance from city centre <br> increases, percentage <br> coverage by lichen increases <br> (1) | Allow <br> correlation idea <br> eg as lichen <br> increases so <br> does distance <br> Allow converse |
|  | - more cars in city centre / <br> more car pollution in city <br> centre (1) | Allow converse |  |
| - more sulfur dioxide in city |  |  |  |
| centre (1) |  |  |  |

| Question <br> Number | Answer | Additional guidance | Mark |
| :--- | :--- | :--- | :--- |
| 6(b) | An answer that makes reference <br> to three of the following points: <br> - measure area of lichen (1) | Allow use a grid / <br> quadrat to <br> measure <br> percentage cover / <br> count squares <br> with lichen | exp |
| - measure the (total) area <br> of stone (1) |  |  |  |
| - divide (lichen) cover by <br> total area and x 100 (1) | repeat (to find mean) (1) |  |  |

| Question Number | Answer |  | Mark |
| :---: | :---: | :---: | :---: |
| 6(c) | An answer that makes reference to six of the following points: <br> - C seeds exposed to $\mathrm{SO}_{2}$ and not exposed to $\mathrm{SO}_{2}$ / different concentrations of $\mathrm{SO}_{2}$ (1) <br> - O same species / age / variety/ type of seed (1) <br> - R lots of seeds / repeat experiments (1) <br> - M1 measure temperature change (1) <br> - M2 using thermometer (1) <br> - S1 thermos flask to contain seeds / insulate / prevent heat loss / eq (1) <br> - S2 same moisture / humidity oxygen / water carbon dioxide / same starting temperature / light intensity / wash seeds with disinfectant / time / eq (1) | Allow seeds with metabisulphite and seeds without | $\begin{aligned} & 6 \\ & \text { exp } \end{aligned}$ |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| 7(a) | An explanation that makes reference to the following <br> points: <br> • produces maltose / glucose (1) | $\mathbf{2}$ <br> exp |
|  | Benedict's test) (1) <br> turns red / green /yellow/orange /eq (with |  |

| Question Number | Answer | Additional guidance | Mark |
| :---: | :---: | :---: | :---: |
| 7(b) | An explanation that makes reference to four of the following points: <br> - same/stated volume / concentration of amylase (1) <br> - same/stated mass of bread (1) <br> - same/stated time (before pouring water) (1) <br> - same/stated volume of water (1) <br> - same/stated volume / concentration of Benedict's (1) <br> - same time of heating / same temp for Benedict's test (1) <br> - stated range of temperatures (1) <br> - repeat each temperature / calculate mean time (1) | Ignore amount for all <br> Allow same size /volume / piece of bread /same type of bread <br> Allow same number of drops <br> at least two stated temperatures | $\begin{aligned} & 4 \\ & \text { exp } \end{aligned}$ |

| Question Number | Answer | Mark |
| :---: | :---: | :---: |
| 7(c) | An answer that makes reference to four of the following points: <br> (increased temperature increases rate) <br> - (due to increased) kinetic energy (1) <br> - (more) movement of molecules / collisions (1) <br> - until optimum temperature (1) <br> - rate decreases at high temperature / digestion stops at high temperature (1) <br> - (because) enzyme denatured / change to active site / no longer binds (1) | $\begin{aligned} & 4 \\ & \text { exp } \end{aligned}$ |

| Question Number | Answer | Additional guidance | Mark |
| :---: | :---: | :---: | :---: |
| 8(a) | An answer that makes reference to the following points: <br> - S scales linear and at least half axis (1) <br> - A1 Axes 'correct way round' (1) <br> - L lines straight and joining each point (1) <br> - A2 labelled 'year' and 'percentage of students' (1) <br> - P points accurately plotted (1) <br> - K key or lines labelled for cigarettes and vaping (1) | bar chart lose L only <br> Do not allow Lif extrapolated <br> Points plotted within one small square | $\begin{aligned} & 6 \\ & \text { exp } \end{aligned}$ |

| Question Number | Answer | Mark |
| :---: | :---: | :---: |
| 8(b) | A description that makes reference to two from the following points: <br> - e-cigarette use increased (from 2011) up to 2015 then decreased / decreased in 2016 (1) <br> - smoking normal cigarettes decreases (from 2011 to 2016) (1) <br> - at start e-cigarettes lower than smoking / significantly low / at end e-cigarette use higher than smoking / significantly high (1) | $\begin{aligned} & \mathbf{2} \\ & \text { grad } \end{aligned}$ |

| Question Number | Answer | Additional guidance | Mark |
| :---: | :---: | :---: | :---: |
| 8(c) | - $15.8-8=7.8$ <br> - $7.8 \div 100 \times 60000=$ 4680 <br> OR <br> - $15.8 / 100 \times 60000=9480$ <br> - $8.0 / 100 \times 60000=4800$ <br> - $9480-4800=4680$ | Allow 1 mark for 7.8 or 0.078 <br> Award full marks for correct numerical answer without working | $\begin{aligned} & \mathbf{2} \\ & \text { grad } \end{aligned}$ |

| Question <br> Number | Answer | Additional <br> guidance | Mark |
| :--- | :--- | :--- | :--- |
| 8(d)(i) | An explanation that makes reference to four of <br> the following points | Allow <br> converse for <br> normal <br> cigarettes for <br> all MPs |  |
| - less tar (1) | exp <br> less risk of cancer (1) | less risk of emphysema / lung disease / <br> damage to alveoli / chronic bronchitis / <br> damage to cilia / eq (1) | less carbon monoxide (1) |
| - less risk of heart disease / strokes (1) |  |  |  |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| 8(d)(ii) | An answer that makes reference to two of the <br> following points: <br> - non-smokers may start using e-cigarettes (1) | $\mathbf{2}$ <br> exp |
| - e-cigarettes may lead to taking up smoking (1) | e-cigarettes are addictive as they contain <br> nicotine (1) | nicotine can increase risk of blood clots / <br> increase blood pressure (1) |
| - e-cigarettes may also be harmful / damage <br> lungs / risks not yet known (1) |  |  |

Total 16 marks

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{9 ( a ) ( i )}$ | • cleft chin or not / appearance of chin / eq (1) | $\mathbf{1}$ <br> grad |

| Question <br> Number | Answer | Additional <br> guidance | Mark |
| :--- | :--- | :--- | :--- |
| 9(a)(ii) | An answer that makes reference to one <br> of the following points: | $\mathbf{1}$ <br> exp |  |
|  | (the section of) DNA that <br> determines whether the <br> individual is cleft chin or not (1) | Allow <br> (section of) <br> DNA that <br> codes for <br> cleft chin <br> characteristic |  |

$\left.$| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{9 ( a ) ( i i i )}$ | • (different) version(s) of the (cleft chin) gene |  |
| / alternative forms of the gene (1) |  |  |$\quad$| $\mathbf{1}$ |
| :--- |
| exp | \right\rvert\,

| Question Number | Answer | Additional guidance | Mark |
| :---: | :---: | :---: | :---: |
| 9(b)(i) | An answer that makes reference to the following points: <br> - both parents Nn (1) <br> - gametes produced N or n from each parent (1) <br> - offspring genotypes shown NN Nn Nn nn (1) <br> - offspring phenotypes shown 3 cleft 1 without cleft chin (1) | Allow full marks from a Punnett square <br> Allow MP2 and MP3 for wrong parental genotypes | $\begin{aligned} & 4 \\ & \hline \text { exp } \end{aligned}$ |

| Question <br> Number | Answer | Additional <br> guidance | Mark |
| :--- | :--- | :--- | :--- |
| 9(b)(ii) | $0.25 \times 0.5=$ | Allow 1 mark for <br> $0.25 / 25 \% / 1 / 4$ | grad <br> graw |
|  | $0.125 / 1 / 8 / 12.5 \%$ | Allow full marks <br> for correct <br> numerical answer <br> without working |  |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| 9(b)(iii) | An answer that makes reference to one of the following <br> points: <br> $\bullet$ environment / diet means different shaped <br> chin(1) | $\mathbf{1}$ <br> exp |

| Question Number | Answer | Mark |
| :---: | :---: | :---: |
| 9(c) | A description that makes reference to three of the following points: <br> - use crosses between different rats / test cross pedigree analysis to predict outcomes / look at pedigree diagrams / family trees / family history (1) <br> - if single gene offspring show simple pattern / shows 3:1 ratios / look like one parent / eq(1) <br> - single gene shows discontinuous variation / two or three phenotypes (1) <br> - polygenic leads to continuous variation / intermediate expression many different phenotypes / much more variation / three of more phenotypes (1) | $\begin{aligned} & 3 \\ & \text { exp } \end{aligned}$ |

| Question Number | Answer | Mark |
| :---: | :---: | :---: |
| 10(a) | An explanation that makes reference to four of the following points: <br> - nitrates (for growth) (1) <br> - for amino acids (1) <br> - for protein (1) <br> - magnesium for chlorophyll / chloroplasts (1) <br> - so more photosynthesis (1) <br> - more glucose (1) <br> - phosphates used for ATP / DNA / eq (1) <br> - potassium for control of water movement / eq (1) | $\begin{aligned} & 4 \\ & \text { exp } \end{aligned}$ |

| Question Number | Answer | Mark |
| :---: | :---: | :---: |
| 10(b) | An answer that makes reference to four of the following points: <br> - fertiliser leaches into river / washed into river / eq (1) <br> - fertiliser would cause algal / plant growth / algal bloom / eutrophication (1) <br> - dead algae are decomposed / broken down by bacteria / decomposers (1) <br> - (bacterial) respiration would reduce oxygen (1) <br> - means were calculated / readings repeated so experiment is reliable / valid (1) <br> - measurements taken at same time of year / in April (so are valid) (1) <br> - direction of river is past farm (1) <br> - reduced oxygen could be due to other factors / sources of fertiliser from other fields (1) | $\begin{aligned} & 4 \\ & \text { exp } \end{aligned}$ |

| Question <br> Number | Answer | Mark |
| :--- | :--- | :--- |
| $\mathbf{1 0 ( c )}$ | manure / faeces / dung / compost / seaweed <br> / bone / blood / animal wastes / eq (1) | grad |

Total 10 marks
